Become a CyManII Member

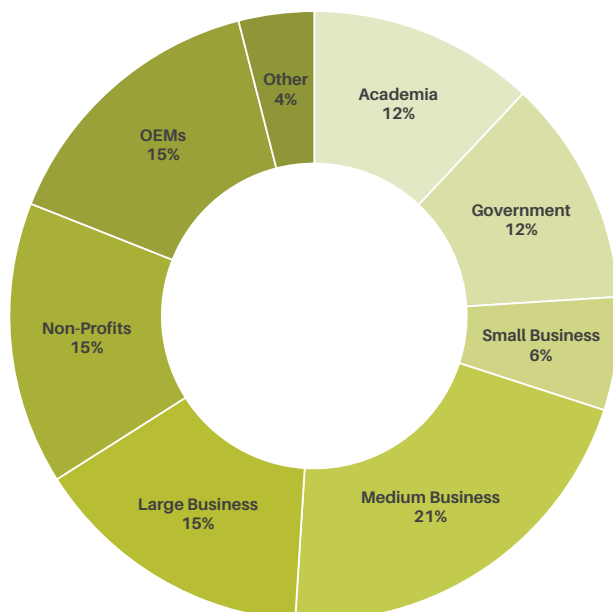

Secure U.S. Manufacturing

The mission of the Cybersecurity Manufacturing Innovation Institute (CyManII) is to secure and sustain U.S. manufacturing through the development of partnerships and the deployment of innovative technologies that will empower a skilled workforce.

By becoming a member, you'll gain access to the tools, support, and training needed to secure your smart manufacturing processes and connected supply chains, resulting in energy-efficient and optimized operations.

Diverse Membership Network

CyManII has a growing, diverse membership network, including recognized leaders in smart manufacturing and cybersecurity from small to medium-sized manufacturers, government, academia, national laboratories, and non-profits.

Why Become a Member?

1. Engage with Industry Members

Join a network of like-minded leading individuals and organizations committed to securing U.S. manufacturing with cybersecurity and energy-efficient solutions.

2. Participate in Project Calls

Participate in intellectual property-protected projects that define, develop, mature, and transition technologies.

3. Access Cybersecurity Resources

Gain access to over 200 leading cyber experts and research programs across 60 top U.S. universities, including the nation's most advanced national laboratories in advanced manufacturing and cybersecurity.

4. Strengthen Your Workforce

Leverage our expert team to develop a tailored cybersecurity education and workforce development strategy that meets your organization's needs and access our CyManII Sealed Training, the Mobile Training Vehicle, Cyber 4 Manufacturing Demonstration Hub, and Cyber Range Learning Lab.

Apply for Membership

Ready to join? Our Institute is eager to partner and grow alongside you. Visit cymanii.org/membership to submit your application.

TOGETHER

Current Members

Cash Contributions
 Include, but are not limited to, personnel costs, fringe costs, supply and equipment costs, indirect costs, and other direct costs.

In-kind Contributions
 In-kind contributions are where the value of the contribution can be readily determined, verified, and justified with no actual cash transacted in securing the good or service comprising the contribution (i.e., the donation of volunteer time, donation of space, or use of equipment).

“ CyManII applies REAL TIME 360 IT PROTECTION surrounding your IT investment. Not having them fully integrated into your system is like holding onto a bare live wire and thinking you won't get shocked. MARK LAMONCHA, Humtown
